

Jekyll によるブログ作成

Jekyll でブログを構築。ちょっとしたメモに使う予定。

以下は、Jekyll をインストールした時に自動的に作成されたドキュメント。

You'll find this post in your `_posts` directory. Go ahead and edit it and re-build the site to see your changes. You can re-build the site in many different ways, but the most common way is to run `jekyll serve`, which launches a web server and auto-regenerates your site when a file is updated.

To add new posts, simply add a file in the `_posts` directory that follows the convention `YYYY-MM-DD-name-of-post.ext` and includes the necessary front matter. Take a look at the source for this post to get an idea about how it works.

Jekyll also offers powerful support for code snippets:

```
def print_hi(name)
  puts "Hi, #{name}"
end
print_hi('Tom')
#=> prints 'Hi, Tom' to STDOUT.
```
